

Implement end-to-end discovery without compromise. The world's leading eDiscovery processing, review, analytics and predictive coding technologies are now combined to help your law firm master all phases of eDiscovery from a single easy-to-use, self-managed application.

LegalComet eDiscovery Cloud – powered by Nuix Ringtail – provides a single-point-of-contact solution that takes on cases of any size and complexity without upfront investment or technical expertise.

THE SMARTER CHOICE

- **Amazingly fast review.** Nuix Ringtail's intuitive user interface and intelligent automation capabilities allow legal teams to dramatically improve the speed and quality of document review while also delivering advanced analysis of case strategy.
- **Integrated analytics.** Nuix Ringtail includes a fully integrated analytics suite, so all members of the legal team can apply data visualisations and analysis to find key facts and fact patterns more quickly.
- **Built for the business of eDiscovery.** Nuix Ringtail helps you manage all your client litigation matters more efficiently with multi-tenancy; client- and case-level reporting and tracking; rapid start-up, training and support; and cross-functional eDiscovery workflows.

Nuix Ringtail's intuitive user interface allows reviewers to complete each task with fewer clicks.

GET STARTED SOONER

With processing, analysis, review and production fully integrated into Nuix Ringtail, you can quickly ingest data and start reviewing documents in minutes – no load files, no exports and a full portfolio of analytics and visualisations.

FIND THE FACTS FASTER

Incorporate analytics into your everyday initial and linear review workflows to figure out what's going on and define your case strategy. Industry-best models for clustering, mapping and graphing distil the whole case into easily understood 'a-ha' moments. Nuix Ringtail's machine learning capabilities mean every time you make a coding decision, your next review assignment is more relevant.

BREEZE THROUGH LINEAR REVIEW

Escape the repetitive grind of linear review and make faster decisions in a single view. Nuix Ringtail's patented user interface uses visual cues and continuous active learning to ensure reviewers can quickly identify relevance and privilege without needing to search for information from hidden windows, tabs or other inefficient UI mechanics.

CALL THE SHOTS

Manage the eDiscovery process end to end with self-service case set-up and administration. Even for the smallest matters, you get all the analytics, review efficiencies and production capabilities at your fingertips.

SCALE SEAMLESSLY FROM A SINGLE PST TO 100 MILLION DOCUMENTS

Nuix Ringtail is designed for scalability in data volumes and number of users. No matter how big or small the case, you can automate the way information is processed, organised and presented to reduce operational costs and simplify hand-offs.

TAKE THE HASSLE OUT OF BILLING

Built for the business of eDiscovery, Nuix Ringtail gives you multi-client administration and reporting from a single view. Reports for single or multiple cases can be used as a basis for cost management and allocation, charge-backs and invoicing.

FLEXIBLE DEPLOYMENT OPTIONS

Law firms of any size can succeed with Nuix Ringtail's flexible and secure deployment options: on-premise or remote software as a service. Pick a model that suits your needs, from self service to managed administrative service.

Nuix Ringtail's powerful analytics, data visualisations and predictive coding are all included in the base licence.
